COOKING RECIPE WEBSITE

Site where people can share their recipes and provide ratings and feedback.

USER FEATURES (all types)

View all recipes

Visitors of the website should be able to see recipes (based on filters like cuisine and/or custom text search and order the results by popularity/recency) with an image of the dish, the dish name, the author's username, a short description, and how many people it serves (number of servings). Clicking the image or the dish name leads to viewing a specific recipe (see: **view a recipe)**. Clicking the author's username leads to viewing the author's profile (see: **view a user's profile**).

View a recipe

Visitors of the website should be able to view a recipe which has an image of the dish, the dish name, the author's username, a description, how many people it serves, the ingredients needed, and the step-by-step procedure on how to create the recipe. Clicking the author's username leads to viewing the author's profile (see: **view a user's profile**).

View a user's profile

Each user has their own page where their basic info is displayed publicly. The page also contains the recipes they uploaded, the recipes they have liked, and all the comments they've written.

NON-REGISTERED/NON-LOGGED IN USER FEATURES

User registration

Visitors should be able to create user accounts so they can create, upload and promote their own recipes. New users are required to pick a unique username and provide their email and password for login with e-mail verification. Optionally, users can put their name and bio, and upload their display picture if they want, subject to the principles of data privacy.

User login

Users can log into the website with their username or email and password.

REGISTERED USER FEATURES

User logout

Users logged in can log out of their website.

Create recipes

Users can upload their recipes and choose which type of cuisine they think it belongs to. Recipes have a description, list of ingredients, step-by-step procedures and images. Recipes can also have associated keywords for easier access or for search.

Edit recipes

Users can edit their own recipes if they feel that changes must be made.

Remove recipes

Users can remove their own recipes anytime they want.

Deactivate/Delete Account

Users can remove their own account anytime they want.

Edit profile

Users can edit their profile anytime they want.

Like a recipe

Registered users can like a recipe just by clicking or tapping the like button just

underneath the recipe name. This is on a toggle basis.

Comment on a recipe
Registered users can comment on a recipe to discuss the recipe.

Edit a comment
Registered users can edit their comments at any time.

Remove a comment
Registered users can remove their comments at any time.

Report
Registered users can report content they deem unsuitable for the general audience, including recipes and comments. To report, they must click the report button just below the recipe header, wherein the report form opens in the form of a modal window which includes the reason why the content is unsuitable or undesirable.

ADMINISTRATOR FEATURES
(an administrator also counts as a registered user)

Handle reports
Administrators can view reports that users have sent, and at their discretion may impose sanctions on the offending user, which may include temporary ban or permanent ban.

Ban accounts
Administrators can ban accounts that they believe deserve it. A temporary ban restricts access to the account. Any registered users who are temporarily banned cannot log in. Any registered users who are permanently banned have their recipes and comments they have posted deleted. Permanently banning users removes all data they have on the website.

Delete recipes
Administrators can delete recipes they deem offensive or unsuitable for the general audience.

Delete comments (of others)
As with recipes, administrators can also delete comments.

GENERAL
Good user experience. Users can easily navigate without help, all information are easy to access. Good visual design. Design suits the theme of the application, and is cohesive and consistent across the whole application
